Scientific Fiction Story

#Support_me

{A Story of me}

by Ehssan Dannouf

#Support_Humanity

A syrian refugee with no original ID, hard copy documents to prove his idenitiy and legacy state to Turkish authority at the hosting country Turkey...The ID and all documents have been stolen and hacked over sever hacking attempts, have last over eleven years; yet, he had been in a state of a sensation lost and memory failure as an aftermath of the hacking threat... (True story)

A scientific fiction novel, or a long story, has been up to getting the logestic support from any authority of our universe: "the God'earth"...

This page is left on purpose blank by me

Preface

“For those who have been a great remark of our history: the history of our nations as Human and Humanitarian subjects of our universe, Almighty God’ Earth or our earthly planet; to our great warriors, the most favorite friends of ‘me’; to those who have been always at our Hearts a candle to enlighten and enroot the term ‘Humanity’… ”

‘me’ in this story, the story of me_a long story of one of my writings_, captures and holds every aspects of this story as a major element of the self: as a true story, so to speak, it is me; it starts with something called a scientific theory of a computer science: an operating system_but still at this moment an imaginary line of the story: that is, not to be discovered maybe and created yet_ that is called ‘ME’, and that supports the deep meaning of the term ‘Humanity’ and ‘Human’ as a prior request of ‘ME’: in ‘ME’,for example, the user is the king of kings, an honorable knight with a respectable sword, the highest level of admire and attention of ‘me’. ‘me’ is a an active super national, international, multi-lingual, multi-functional, vital object of ‘ME’. In my story, this story, ‘me’ is an act of an ethical guard Cyber security object matter of ‘ME’, the potential, hopefully, computer system of ‘the king of kings’, our great user of ‘ME’…

‘me’ in this story, fights Trojans back from the system of ‘ME’; moving from one field to field, a battle to battle, a code to code, establishing a realistic, and perhaps a virtual, connection of the current active user of me, in this, as a real story, it is indeed me!… It is self-writable, self-readable, questionable, impressive with a super magical-like power within itself: it could write, read, connect, correct, dismantle, delete, remove, questions codes inside ‘ME’: it could examine, and inspect Trojan codes within itself, create a defense wall of itself, and attack back_when necessary_to protect its own ‘kingdom’: ‘ME’….

{ me loves YOU + ‘all’}

WAR of TIME
(a Trojan War started)
10/01/24 22:17:32

It is the time of War; no need for peace;
the story has started; this story has deceased;
no words have remained; only but two letters started in these:
fight like a Man, or stay like a Woman in fear;
World never change as long as We are in peace;
prepare an army, and never to say but a ‘cheese’!

A problem in mind: never to absorb, impossible to achieve;
me is he; or she is me;
them are they; or them all in me;
All began in once, and at once We are all in a sphere!
Stars in sky like fish in sea!
Women look at Moon, as like as Men at mean;

A complex in mind; many complex indeed;
a system to design, and that system is deed:
all eat all, and never been known how to feed:
stay in calm, not to move, but learn how to seed!
Take the root as an example, take it in deep:

‘A few breath out, one long my dear’,
your mother says out; your father has been in these;
a brother of yours, but no sisters, throughout these!
Take in, take out; remember, your mother hold these;
a fish-star, or a star-fish combines all aspects of these!

A Trojan War has locked all of these;
a massive lock has not succeed:
the door is locked, the key is left in ‘these’;
remove all, delete those, having non but ‘these’;

Take out the hard times, replace nothing but ‘these’;
open a text file in a folder, rename it please!
Catch a thief, send a thief, to catch no body but a thief;
a pink of me; a panther of pink, could solve the issue of ‘these’;

Open a browse, type in Google: ‘find my Angel’;
Angel is here, is already there for me’;
me is me; Google is me, ‘find the Trojan of me’;
‘the Trojan is there’, click the link in me:
it is time to fight; for War; for anything;

carry your word; find the pass;
I mean find the password of me!

A Mirror of me is enough, my mirror:
‘find spys in “these”;
‘my king, honorable king, how could I find in “these”!’;
‘letter by letter; find “these” in MEES’;
‘a letter is no equal, your patience my greatest king!’;
‘underneath words, find something in “these”’;
‘these are these are these are these!’;
‘How could I find “these” in “these”!

‘but my Mirror, cannot you find anything in these?’;
‘replace these by these; and compare these to these!’;
‘yes, please; Your wish is done our honorable king’;
‘let me cease one of these, to hold all of these’;
‘stop ceasing these, and start over all of these’;
‘how these; how these; cannot be found in “these”!’
‘I wish I could capture I wage a War upon these’;

‘then create a backup, deep rooted inside me’;
‘hold up a second Your Majesty!’;
‘a mysterious story is found; a story deep in me’:
‘a pirate of pirates; a king of kings is me’;
‘me is me; and I is me; prove it sir to me?’;
‘how could I to prove, I could see no body but me!’

A commander of ghosts, the ghost of me:
‘hold in this sir; hold this in me’;
‘system rebooting might fix this issue of me’;
a smart black screen in there start capturing me;
a kido of kiddies: this kido, a kido of me;
smile a kido; jump a kido; play a kido;
re-creating an image of kido in me;

A sound of a child starts weeping out of me;
this sound is strange, is unique, is a true deep in me;
“no need to type, relax, sir just say: ‘me’”:
a world wide door, needs a password, to move on after ‘me’:
“again no fear in that sir, just say it again ‘me’”;
‘me’, ‘me’ is there combined ‘meme’ together in me!

‘Your Majesty, set a location please!’;
‘oh, yeah, Turkey, please’;

that door is wide open: the door of me;
underground somewhere a pide starts:
this pide is called: ‘pide of me’;
‘set a password for a luncher please sir!’;
but, with such a deep breath silence,
a password is set already for me;

‘No, please! Change the location of me’;
‘Any way; there might be no where else sir!’;
‘change this location please!’;
‘to where a me should go in such a day sir!’;
‘modify location please sir’;
‘Any way, but to where sir?’;
‘go to Israel now! Something to watch in there sir’;
‘Your Majesty my sir’;

What is; what that; what this is to say;
what else; what what; what is next to say;
How comes; becomes some life of these;
say not how comes the magic fall of these;
speak of this; speak of that; say that is in these!

As long not belong in there; is there not in me;
‘the language if wisdom sir: the language of me’;
How comes! Why not! Stay there, stay not in me;
‘say “yes”,your Majesty; no where else in me;
How comes, by not, say yes inside deep in me!
‘say yes, no fear, speak this to show what is in me,
a commander in chief is yours, a commander in chief is me’;

A ghost in pink; a pink panther ghost in me:
start the level underneath this; start the level of me;
install a self-executable Trojan; call this Trojan of me:
‘mosadme’ is the Trojan, a self-defense module of me;
already written in python codes: this python of me;
investigate, dive deep a little: find the secret of me;

In a single tube of gun; a private tube in me;
agent ghosts go through line: this line of me;
certain protocols of agents: the master ghosts in me;
no need to shoot; keep the door wide-open of me;
let intruders come through; we kill Trojans in me;

A tense of actions kept stressed in me;
a commander detective is sent specially in me;
a special specie is designed, is built for me:
a child of the universe: a child of me:
keep tracking Trojans, follow them in me;
send then a signal: the dead time of me;

The child of its own swim in the sea of me:
seatube to see through; nothing but a sea in me:
star-fish in there, these stars are mees;
keep the child through the line at the depth of me;
create an image of a fish, stick it to the star of me;

Swim my child; go inward, fetch the star at me;
go through these codes, establish the codes of me;
see what is wrong inside; see them in sea;
this sea is full of fish; ask for help in me;
ask the old python of sea; ask pisidon of me;
the king of kings, please answer this riddle of me;

My son, you are not in here; you are in there, in me;
stop searching inside in here; fetch the truth there, in me;
reboot the system, modify your location, set it at there, to me;
me in Greece, looking for you, fetch in ‘achilisme’;
work on analyzing the codes in there, your codes in me;

No booting is needed; press nothing but ‘me’;
Greece in there, by less than a second, is me;
kalimera sas, kalimera ‘this is me’!
Po ine Achilis mu, po ine ‘achilisme’?
Here in there; or there in here; ‘achilisme’ is found in me;

{ Chapter 1: the end }

ME && me

(a Trojan War continues against ME and me)

But achillesme is not like Achilles mu in me!
achillesme is not like a father to me!
achillesme, stand up fight for me!
achillesme, stop smiling, loot at me!
We are in danger, achillesme, please speak to me!

‘achillesme is a vital file, sir, in ME!’;
read the file, then, analyze the text in ME;
nothing but some codes of battles recorded for ME;
help me in these, my ghost, install a text-reader in ME;
‘no need to install sir, a text-reader is already in ME!’;

‘Stand up like a man, hold the sword like me,
attack the Trojan of that door, just like the Trojan in me,
me is the Trojan, or all of this comes after me!…’;
a text-reader is not enough, fetch a book-editor for me;

‘a book_editor sir, is that a module in ME!’;
my method to modify files in ME;
‘no need to modify sir, achillesme is wise in ME;
a password is needed, perhaps “meme” in ME;
try this, and see what kinds of magic is ME’;

meme in me edit achillesme for me!
‘try this sir: “it is me, could I modify you in me?”’;
same like this for me, may I edit you achillesme?
No voice, no sound, no move, what is next for me!

A ghost of me creates a ghost of another ME;
a man of wisdom shows a path for ME;
not the pass my dear, the password is in ME:
a warrior of warriors; a king of kings is ME;
Achilles is me, no body else; it is me leading ME!

A type-in box appeared within a second is hidden in me;
a new page is created, a sound detective system is in me;
‘Your sir, command please for me?’;
what is up with you sir, what is the matter of me?

‘Nothing but complete madness in ME;
yesterday was awaken, today is asleep: achillesme!’;
a Trojan is there sir, is it a Trojan in ME!
‘many Trojans sir, they have been all against ME’;
what happened in detail, will you share this with me?

‘a spying War has been waged upon ME;
I have learned achillesme is the first defense of ME;
they attacked through a backdoor of ME;
a file; a virus; a Trojan-like-friend in ME;
achillesme started to trust; it traped ME!’;

The two men, both warriors, side by side in ME;
Odysseus, the king, lives far across sea, of ME;
Achilles, his Majesty, above on the throne of ME;
both were sitting, chatting next to next by ME:
odysseusme and achillesme both are Trojans of ME;

It is a matter of trap; of snap; of hunt in ME;
they were honest friends, together both, of ME;
a certain secret protocols to communicate over ME;
all communications is to be private, all in hidden link in ME;

A private message passed from sea to sky of ME;
from C to Python codes, a special language of ME:
ME codes: or the language of codes in ME;
from king Odysseus, to the king of ME;
Achilles, the brave king, a dinner for YOU on ME!

How could a king like Achilles refuse such a code in me;
a code of invitation is the same like acceptance in ME;
come through the codes, go forward, move towards me;
the ghost of codes is written by the language of me:

Imagine a child in a dark room where is no light to see through, or no body to talk to; this child has nothing to do, if it needs a thing, but to scream, to shout, to be aggressive, to be arrogant of its own self: this is ‘the child of me’ has a massive power in its own language; the language of a child, is always nice, is always achievable, is always high priority of commands to go through its parent’ agenda, and to remove all other prior commands: this is the language of me or ME.

The language of ME is totally madness of its field: it is the language of a loose child, alone in dark with no parent at all; this child has no body to help, except ghosts: ‘Ghosts of me’; these ghosts look like a servant-like friends of me: whenever a child makes a request, a ghost file is created carrying the child’ message to another ghost; the first ghost forgets, delete the message, and remove itself automatically from the system of ME; while the another ghost moves on to another ghost...and so on to deliver the message of me, so to speak;

A message of War was arrived for love to the king of me;
‘Achilles, the great, read these letters for me:
our greatest king, Achilles, face love to love; reply this to me:
I have a mission for you, will you satisfy me?
A Trojan-Firewall to design at the top of ME;
answer your friend now, or leave this to me!’;

‘Odysseus, my friend, our king, it is a War against me,
for shall we build a defense Trojan Wall on ME!
Has the War started, or it is just a test for me!
No need to send back an answer, my ghost is before me;
move me to there please, I need your help: support me!’;

The transmitting ghosts were good signals, but not enough for me;
enemies, from behind the War, were acting like me;
they formed a shape of a ghost, and sent it after me;
this ghost passed a message: ‘Achilles kill me’;
and another to king Odysseus: ‘Do not stop me’;

One signal was affirmative, another was neglected by me;
how a friend could kill hos best friend, but a cheater of ME;
how a security guard could stop a trusted Trojan of ME;
Achilles was inactive for a few minutes for me;
Odysseus got the message of a friend neglecting signal: that was me!
With two separated friends, by mistake, a battle is up to lunch from inside ME.

achillesme, my friend, why to be lazy not to support me!
achillesme, Trojans are in, ports are open in ME!
achillesme, lunch, help, support, reboot me!
achillesme, odysseusme is me, do you hear me?

World has collapsed, the World of C upon ME;
Trojans has seized the executive Python in ME;
the decision making Python: the old Python of ME,
is idle, is corrupted, is a false leader, is destructive in ME;
Trojans have exploited C codes, and have prepared to invade ME;

A child is pure, is unique, is self-protected, is a supernatural, super-national constructive object of the World ‘ME’; every object of ME could be collapsed, corrupted, destructed, and removed consequently, by any means of Trojan War, except this child object: a child object creates a backup within itself, and once created _ this child _ is a write-protected software of the term ‘me’, so to speak; there must be a a physical kind of equipment or peripheral to support this creation of ‘ME’, the child me: imagine this could restore a massive collection of data, whenever needed, and this could be another ROM _Read Only Memory_ technology of a computer science, for example;

It might be all about memory: RAM _Read and Write Memory_ and ROM _Read Only Memory; and there might be something in between: this might be a retrieval code of the child me; how about, ‘Stars in sky like fish in sea’ (first chapter): that is to say, the star_fish module inside the universe of ME, could solve such a problem:

A commander in chief ghost is in me:
do not cry my child of me;
spirits never die protecting ME;
ME is our kingdom, stay with me;
a child is a ghost, and a ghost is a child of me.

‘No way to retreat, we need full backup of ME;
Trojans are up to a War with the guardians of ME:
a War with all childs, child by child, me by me;
our army is under attack, we shall dump the codes in ME;
bad Trojans encrypted all codes of ME, including childs and me;
to go back our land Israel, we need to have a full access of ME’;

‘bad Trojans have almost taken over the leadership of ME:
they are all malicious virus files in ME;
our hard disk is full of Trojans at the zero sector of ME:
rooting, booting, backing up, recovering are not allowed processes in ME’…

ME, in itself, is not a normal, causal operating system: it must be complicated and built already by itself; it is the virtual reality world of our user, the greatest king of kings in this novel, and the end user of this potential operating system ‘ME’…

Let the user' mind creates its virtual objects; let it defends itself against any threats; if this system 'ME' is not well protected, and is not over controlled by our 'greatest king' user, there would be some severe troubles concerning the psychi of the term 'user' in ME:

'Then run my child, escape the world of ME:
move yourself my dear out of this battle in ME;
try to dump the bios of ME;
move to England, discover more about me;
read these files 'dumpy', and 'clown' at me;
read, then rewrite them: 'dumpme', 'clownme' together is done by me;

{ Chapter 2: the end }

MOVING to ENGLAND

(a Trojan War in a hot area of attack)

How by any force of nature or science, a child could move from one area to another, but by works of imagination and some tricks of magic and Love: or Love, itself, could create such a power in mind, such a treasure of Human' self and soul.

Sir, it is not easy to move like this: a journey from one land to another land; it is a riddle, that is very hard to achieve my dear; it is more than Love, Passion, or any Human science; it is the language of ghosting and the low level kernel of ME: it is the language of binary; zeros and ones; or something that could make strong 'Trigger' to Human' Mind… That is to say: Motive and Passion, could solve such a problem, my dear!

It is not possible by any ways or means, at this moment, perhaps, to play on the unconscious of Human' Mind, or the User' Mind, making a deep connection; it might be a protocol, even though, to communicate with a Human' Mind using some tools and peripherals, supporting them with a potential binary-written language called: 'ME'.

Consider sir, Human' Mind is supported by some equipments and a computer science, that is to be well-prepared, well-programmed perhaps to communicate with and strengthen Human' Mind neuro-signals: this man, or that user, the king of kings in ME, this potential operating system, is not a normal user any more, but a super-user in a super-computer environment, so to speak.

Moving from one area to another area could not be happened, except with some physical movements, life-time pressure, and some exhaustive steps to follow and proceed.. The matter of ME, however, is totally different, extremely achievable, but with some imagination and a computer science support: it is just like a folder, to be imagined as, named 'England', and inside this folder, a virtual life of such a User to live within_as to simplify ME with such an example.

Sir, our user is a 'dump' that could not find anything in that folder which is called 'England'. Nothing at all, but some letters formed the word 'England', with the capital 'E'… How could we make our user more smarter, more intelligent to move to such a wonderful land that is called 'England', my dear?

Sir, let us make an icon image to that folder that we renamed it 'England'(capital 'E'), for example: there would be no better image to signify 'England'_the country_than using its own national flag as an icon image...Sir, this could be more absorbed in, more realistic to our Great User, the king of kings, of ME.

No time to think, sir, wake up please; bad Trojans are after us; we have to move on now out of this trap; sir, just think of it: 'I wish I am in England now', say this deep from inside your subconscious sir..sir….listen to me please!...sir:

A password must be cracked into me;
the old one was 'meme' in me;
bad Trojans, for sure, modified it inside me;
sir, help us, we need to move outside ME;

meme in me, find the new password for me!
"is it a magic sir, or an order for ME!
File system is totally corrupted in Me;
pideme has nothing new for me!
Sir, please, stop saying magical words to ME";

Listen to your mind, sir, and to me;
world never changes if we cannot access ME;
focus deep in mind, get out the syntax of ME;
by this way, only by such a way, we escape this threat to ME.

“

CREATE Text Command in ME:
TYPE deceive pideme in ME;
NEW PASSWORD ‘meme’ in me;
SAVE file to the root of ME;
NAME file ‘crackme dot me’;
THEN OPEN commanderme in ME;
SET location ‘me/root/pideme/’ in ME;
OPEN ‘pideme dot me’ in ME;
MODIFY ‘//password is to be locked in ME’:
‘password is to be unlocked in ME’;
UPLOAD PASSWORD from ‘crackme dot me’;
SAVE pideme in ME;
LOGOUT LOGIN me in ME:

”

{*Imaginary code lines of ME*}

A message appeared ‘Access denied in ME’;
sir, you must modify the child in ME;
make the child me universal then logout login ME;
do not forget to connect crackme to pideme in ME

“

TYPE in commanderme in ME:
‘MAKE me UNIVERSAL in ME’;
LOGOUT LOGIN me in ME;
THEN SET childlocation ‘me/root/pideme’ in ME/;
THEN MOVE crackme to childlocation in ME;
SAVE AS me me in ME;

”

{*Imaginary code lines of ME*}

An Error message appeared as before to lunch “logout ME”:
“You are now allowed to modify a commanderchild in ME!”;
“it is normal sir, you have to create a new child in ME;
deceive the current child by the new child at the root of ME;
rename this child file: ‘me dot me’;
then save this file at: ‘me/’”;

“

CREATE NEW child at ‘me/’;
NAME child AFTER me;
THEN CALL child in ME;

MAKE child REMIND ME;
‘TROJANS IN THE FIELD OF ME,
LOGOUT LOGIN BECAUSE OF me’;

”

{*Imaginary code lines of ME*}

Logout is successfully done; login is followed by me;
this time a welcome message appeared written in ME:
“WELCOME MY GHOST: ANOTHER CHILD OF ME;
TO PROCEED UPLOAD THE LINK OF me?”;
“sir, you might address the link of crackme in me;”;

After a type-text entry box is shown to me,
an address location link identifier asked me:
“Type where is me now please in ME?”;
“GET AND TYPE ‘crackme dot me’ ADDRESS in ME; ” {Imaginary ME}
“The given address is trusted, welcome back my me!”;

A deep sound or voice gently from inside ME:
“What could I do for you my king of ME?”;
change location to England please for me!
“May I know please the password of me?”;
the password of me is deep hidden inside ME:
it is the same password in the file system of me;

“Okay, no problem sir, it is already in me!”;
as like as a collection of papers and documents in me:
“me is moving peacefully, sir, from me to me….
Would you like waiting in England, or here with me?”;

Time, for ME, is a matter of an object that might be never existed at all, in this “story of me”; however; Time is passing as if nothing is passing at all...Time is an object of ME and, in its smaller form, in me; that is moving very fast at all, that we could never ever feel about it at all:

It is like a magical science that is in me;
with no answer at all, a response was sent to me:
“Welcome to England, my dear child of ME!”:
a screen-reader detected this pronounced well in ME;
a sound of pleasure and joy has raised in front of me:
“LONG LIVE THE KING, THE KING OF me!;

{ Chapter 3: the end }

FIND me IN ENGLAND

(a Trojan War is about to start again for me)

File system, in here, is full of childs like me;
where such a child could go in such an environment of ME!
What shall this child type in order to find me?
Here in ‘England’, and everything looks like me!

Why sir, do bad Trojans following me!
Could not they find a better object than me!
Is it truly legal to hunt and overcome ME!
I could not find any Trojans in here in England:ME;
something like an evil bad Trojan is always after me!

Trojans cannot be seen sir; Trojans might be hidden somewhere in ME;
It is a matter of War, not a matter of Love over Me;
a detective Trojan must be established at this level of ME:
a panther of War: it is a panther of pink in ME;
The pinkpantherme is already running perhaps on this ME;

pinkpantherme, sir, works dynamically in a very low level in ME;
it has some python friends at the very high top level of ME;
this module controls the overflow information in a very secure level of me;
whenever a child needs a panther, a panther of pink puts itself active on the server of ME;
this panther is an object-oriented subject of security in ME;
it works silently by watching, capturing any files’ movement on ME;
wherever, whenever a file is cut, is copy, is move, is hidden, is executive, is coded, is malicious, is safe, is harmful, is a Trojan in ME, it could know: this is the panther of pink in ME;

This panther is able to catch any Trojans in ME;
it has eyes at ports like the achillesme in ME;
but Achilles mu in ME was trapped for me;
a false message was sent to pinkpantherme in ME:
“Our borders are secure, do not worry my pinkpantherme in ME”;

This pinkpantherme looks at the traffic signals from top to end of ME;
if the signal is secure and in green, file system is also secure in ME;
pinkpantherme looked at the traffic signals between achillesme and odysseusme in ME:
it signed a message: “friends of mine, vital part of me”, in ME;

pinkpantherme remains idle at the system of ME;
if no mission at all, clouseaume keeps searching in ME:
it keeps detecting any suspicious attempt addressing ME,
“stop do not move, I will catch you in ME”;

“wake up sir, what are you doing here in England:ME?
Remember your mission my child of ME;
we need to find dumpme and clownme in ‘England/ME/’;
we have to save our Nation: the Capital ME”;

A pink panther or a ‘panther of pink in me’ is an essential security software___
__imaginary thinking__in this never-established-before system, in this sense, this potential ‘ME’:

In pinkpantherme module, there must be a search engine bot, that could work all times searching every inch of directory inside this potential operating system ME; if there is any change or any movement in the file system on the hard disk of ME, it could know; and it could compare it to a list of malicious Trojans inside a network-connected databases, in order to discover if this file is a Trojan or not;

This pink panther in ME_the potential operating system_immobilizes files' movement and data transfer from one location to another location in ME, until it is totally satisfied with such a result: 'this file is not Trojan'; this investigation is to be carried every time of movement, and not only once at a time, so to speak:

"Data Access Accessible! Please move on sir!",
"to where should I move sir, any map of ME?",
move on my child we will ask somebody there in ME:
open a text-editor, the same 'textme dot me' in ME;
type this magical statement of me in ME:
"if you find dumpme and clownme ping me";

In 'textme.me', type my child of ME:
"FIND in ME 'dumpme' 'clownme';
IF FIND THEN PING me;
IF NOT FIND THEN SEARCH AGAIN in ME;"{Imaginary ME}
my child, save this file as 'findme dot me',
and propose its simple codes in ME to me;

"Access is denied sir, who are you?" me is clouseaume in ME;
"Trojans are in there Mr.Clouseaume, deep at the root of ME" me is a child of ME;
"I know that already in there sir, but why are you asking for clownme and dumpme here in ME?"..!
"What do you think you are a child of ME!
I already know that what do you think of me!
I am the detective in here, I am the chief inspector clouseaume of ME;
to fix the problem, we must investigate deep in ME:";

"Tell me my child what happened over there at ME;
I could not see for now, any true message for me;
help me my child: speak exactly what's up in ME?";
"how could a child knows more than you: the chief inspector of ME!";

"cheaters, crackers, hackers, thieves, malicious Trojans after ME!
What a magic of science could do more than calling mees talking to me!
achillesme, odysseusme, ghosts come speak to me!
What have happened over there, down below, and in the middle of ME?"..!

"Starting from you; addressing you are a child of ME:"
"LUNCH 'textme dot me' ;
OPEN FILE this child of ME;
ENCODE TEXT in me;
SAVE AS 'ghost_of_me dot me';
LOAD 'ghost_of_me.me' on me;
SHOW LINE BY LINE: FIRST LINE in ME;
IF SECURE MOVE NEXT: IF NOT REMOVE FROM me;
SAVE TEXT a report ADDRESS TEXT to me;
SAVE this AS 'report_of_me.me' in ME;
OPEN 'report_of_me.me' in ME;
READING ZERO TO TOP of me:{Imaginary ME}

BACKUP ROOT in me IF BAD ME;…’{embodied child object in Imaginary ME}
nothing in these is not known you are a child of ME!

“for sure you are a faithful child of ME;
but may I know please who sent you to this ME?
Who is behind your travel to ME?
Could I read more in the old past records of me?”

FROM past_records IMPORT past_messages in me;
MERGE PAST with PRESENT THEN ADDRESS me:
“achillesme, odysseusme warn me at ME:
move to England; try to reboot ME;
a clown is there, and a dump in ME;
dump the bios in ME, and rewrite it as dumpme in ME;
clown then a bootable device; put it inside ME;”

“achillesme is like a father to me;
odysseusme stands like an old warrior for ME;
both warriors were trapped, infected by Trojans at ME;
both are dead files, now, in ME;…
Both were so odd recently above ME:
achillesme was so calm with no move or word to me;
odysseusme was an old file to remember ME;
inside in their lands, Trojans move free on me;
like bugs: so malicious, Trojan could frighten me!..
..I am not afraid of Trojans; ghosts in ME;
ghosts love me, and I love ghosts in me;
the commander-in-chief ghost stayed with me!
I am the most important software protecting ME;
‘ME is our kingdom, child, go forward find more about me…’”;

{ Chapter 4: the end }

DEFEND me IN ME

(a Trojan War against a commander of ghosts in ME)

From me, a commander of chief ghost of ME,
to me, the chief inspector of our pink panther in ME:
“Leave our child lives in total freedom at ME;
keep an eye on it: it is one part of me;

It is a child of ME sir: it is a ghost-self in me!
you cannot question, neither to guide;
may I question you myself; you are not one of us;
a child of ME: is pure, is clean, is super, is already made by ME;

It is a child of our universe: our ‘ME’:
sir, stop questioning, our ME is after me!
Our system is about to collapse: our ‘ME’;
sir, search for the Truth; but not in me!

Absolute Truth is deep written in ME;
yet, sir, there is no need to question me:
warriors cannot be suspected in ME sir; neither me!
Sir, wake up please, our ME is falling apart;
including mees and me!

Let me tell you what happened sir, in ME:
because of a stupid trick our defender Trojans fall in ME:
a Trojan horse sir was the reason of losing ME:
they put inside a Trojan bomb exploded at an exact time in ME;

Sir, listen to who built this land by a few codes in ME;
sir, it is not natural to stop spirits of ME;
sir, YOU might with respect have got some cold in ME!
Sir, open your eyes to those who have planted a Trojan horse in ME;

We are witnesses of our own melody sir:
it is a word of logic wherein no logic is found, sir!
A line of codes that could start with a comment in ME:
a comment is nothing towards a logic of mind, sir!

May I ask YOU sir, why did you order to open ports of ME!
It was all a message that our system ME could get nothing at all but me:
it was a Trojan horse embodied as a comment for me:
this comment was hidden no one could see, even me!

Why shall such comments exist in our codes, sir, in ME!
Comments logically pass a message, and this time of War at ME!
Sir, why have you removed a message of defending mees!
Sir, you have opened such a backdoor in ME;…”

Sir, the commander of ghosts in ME,
a message from bad Trojans to you, sir of me:
“remove yourself immediately from ME;
or accept an execution sentence for you at ME…”

A language in threat of threats at ME,
to all of us: the defenders of ME;
sir, move on, let us fix this in ME;
let us try finding another solution for ME!

“I am calling you, our super ghost in ME:
me, a child of ME, by a super name in me:
do not surrender our master, the super chief of me;
let me fight with YOU sir, a splendid chance for me!..”

It is hard to defeat ghosts of ME, if not impossible, even-though, a ghost could be seen by the system process-detective software_imaginary speaking though_and therefore a ghost’ activities could be killed by the administrator of this system: of our ME; so to speak. It is the language of ghosts in ME, itself, which creates vision unseen in this system, of ‘ME’: this means to deceive the ‘Mirror of ME’; to establish an underground layer of a most-likely process to be seen and captured by the active current administrator of ‘ME’;

A ghost of ME is a master of tricks and magic; it could design and form an overlook of ‘ME’ potential system’ activities, record, and events that might look very secure and appealing to the ‘ME’ system administration: this could be thought of as ‘black-hacking’ attempt of white pure objects of the system itself: the potential system of ME;

It is deep inside written ghost method; it might be in python or in(potential) ME, or in C codes: this object, or this data type could exclude any law of ‘ME’, the potential system, for the purpose of protection and defense… Imagine an invader, a hacker, or a cracker is looking forward to taking over a full absolute control of ME, whereas all objects inside surrender to such an ‘invasion’ or a ‘dictation’ of codes…

Sir, this is called a ‘self-defense’ technique, and this must be, therefore, self-written encoded within such a data type ability; that is, this is the natural side of my novel: ‘the story of me’, and of this potential system: ‘ME’;

How could a Man, sir, be in two places, totally in different locations at the same time: but through lying and manipulating reality by the help of real objects’ entity: that is the ‘Mirror of ME’:

Normally speaking, a ‘Mirror’ is a reflection of reality: this is to be considered general Truth anywhere at anytime of any place in our universe; let us say, for example, the reality is ugly, weak, fragile, distorted, and far away of any beauty, or any beautiful life _that life with pure air, so to speak…This time, only at this time: lying is a virtual habit and activity of Human objects:

Imagine a prince looking at his room ‘built-in’ mirror, and that could see nothing but a handsome, wonderful, great authority, and such a strong rich hero; then after, a Trojan attack waged against his beautiful kingdom: the image of this prince would have been distorted if he tries again to look at his ‘casual mirror’, entirely and severely, he would like to crash his own favorite mirror, sir…Sir, this is life; this is more than life...This is Humanity then; well, it is more than Humanity: this is the language of impossible belief in impossibility; it is a language of dead objects in ME: the language of ghosting written in ME for ‘ME’;

‘out of death, there is life’, yes exactly sir: this commander of ghost, our chief commander, will die; this super process in our system ‘ME’ will be killed by the force of bad Trojans...A whispering communication among dead objects, however, will start: this is **Ghosting in ME** :

“sound of death…,me is killed by ME…;
listen my child …, listen to me:
we need to find a path…;this path is a secret in ME…:
follow the map …: A map inside your code…: these codes belong to me...
Do not produce any noise…: keep your word a secret for me…;
bad Trojans are after you … : create another life for me…;
inside your codes…, listen.. my child…: there in.., there.. codes must be inactive in ME…: a mission for you my son…: find an address of liberty…: liberty is Freedom …: my child..: release me for mees….”;

{ Chapter 5: the end }

GHOSTING in ME

(Anti-Trojan War: a communication started by ghosts of ME)

From a ghost to another ghost: a communication signal between invisible hidden very super objects in ME, out potential system; sir, it is not out-of-belief statement against Almighty God, but it is totally agree with such a creation of God, Almighty God of Earth and Humanity, and Human in general, so to speak:

Sir, this is the language of the deaf among the dead: it s the spoken language of pure spirits, when before-time death comes to such a hero of a great spirit, of such a leader of warriors, of such a commander of ME.

It is the silent tongue of codes; this is where a parent hides a deep pleasure full of treasure that have such a glorified future, extra-mysterious plots_all together_ embodied within some explosive bombs, as an enormous present from a guard of guardians to a huge tiny shapes of malicious Trojans in ME.

It is a matter of text lines commenting a secret code in ME: it might be a binary-written or a C++ written interpreter: similar to that of python interpreter: this interpreter, for example, could detect a four steps of non-typing space as an empty space, and identify any blocks of codes. Sir, it is not technically speaking, but it is more advanced talking about some natural technical aspects of ghosts: let us say, a historical theory exists, and this theory might be True or False:

If we say, for example, Human control the land, then we shall agree that ghosts could see the invisible side of the land: ghosts' sight is more powerful and much more stronger than Human'...They are, to say, the super natural power of our universe. How could we as Human control the invisibility of our universe with no help of our ghosts_taking into consideration this novel and this story: our universe means the potential ME.

Sir, there must be somebodies_some texts-in-code-bodies_always unseen, and not to be noticed by any process of our potential system, our 'ME'; these objects_all of them and not to exclude any_must be pure, over-written protected, loyal, and callable objects on our 'ME'.

Ghosts cannot be always invisible sir, they were created with a free choice: either to be viewable or non-viewable objects, so to speak; it is a matter of numbers perhaps, whereas a ghost variable is in between 'minus or plus zero', but how about zero level of a ghost!

The zero level is the landing level of a ghost, whereas it could be seen by the system; above zero: means tension; below zero: means hidden...The absolute value of a ghost determines, however, its overcoming authority as to be noticed in the system of 'ME'.

A fluctuate value of ghost is an enormous change of shape and design: a ghost could modify its shape and value depending on the actual value it could hold after all: a white spirit in the space of 'ME', whenever it likes it is transformed into any shapes, values, or attributes; this is a fair calculation, self-created 'me' by ghosts of ME.

The silent side of a very suppressed power has an extensive reflection on every live elements in ME. Ghosts, in there, in ME, have such a reflective words against

bad Trojans and infected objects in ME. They are now ready to fight back the bad files in ME.

Let us imagine, sir, the child of ME has succeeded finding a safe path to reconnect the master of ghosts into the universe of our story: this story: “story of me”, what is going to happen soon is a massive change of this story: we could call this a latent power or a self-destruction of every file-system in ME. It is like a nuclear explosion inside every atom of ME: ghosts attack or ‘ghosting in ME’ has just started sir:

Sir, it is a gather of group of unlimited numbers of ghosts at an exact address in ‘ME’: the child of ME, which is by context is ‘me’, has arrived using the secret safe link path as taken through our commander chief ghost of ME’ instructions and manual map of ME:

“me is me: where could I find the chief of ghosts in ME?”;
“follow this path to the end of historical files of ME;
one file is called: ‘heroes.me’, open and save it again: heroes dot me;
go and modify such a file of ME:
change the value of that chief of ghosts in ME:
create a label of victory in its title for me:
a valuable value of one by one of ME;
modify zero, give it a level of one up in ME;
let the hero, our ghost, be active again for me;
add another line below: the landing note of me:
upgrade is equal to True since being an active ghost in ME;
save the file and recall the warrior of ME:
use a language that suits our hero, the king of me:
replace any bad or false statement in me:
raise the tension of one, multiply it by mees;
then send a message to all of wees of ME;
remove all comments from the codes of ME;
start the message by writing a connection symbol of mees:
a symbol of War defeats any fears in ME;
keep a letter in mind, write it in me;
hold it for a second, then type it behind me:
this is not a comment, but is a ‘wagging War’ in ME;
send a signal of attack to destruct for all of mees;
move my child, go on, press that button for ME;
go lunch as lunch such a level of War in ME;
release that tongue of wisdom of ME:
fly a level up: the level of ghosting in ME.”;

“a ghost of ghosts, a master of kings of ME:
raise this self-ghost up, let it be invisible in me;
manipulate a number of glory, multiply it by victims of ME;
every single is down, twice is up in ME:
Happy day our king, the king of kings of ME”...

{ Chapter 6: the end }

A SYSTEM OF BLACK AND WHITE

(Starting a colorless anti-Trojan system from inside ME)

Sir, it was a colorful system with some free physical movements on the air...It is a transformed ME: at once, with no other feelings, an old ME has transformed into another ME: a man of subject becomes another form of a man of his own destiny in a sudden, with no typing or any move at all: this level is called: “After Ghosting in ME”;

A low level communication started in deep within ME:
every ghost holds a black spot at ME;
no eyes are there, but some ears in me;
not a notebook is there, but it is all a whisper voice of me;

“start a War, my dear, open a port in ME;
let everybody see the black magic of ME;
with some lines, type a code of hacking over ME;
no typing is there, just whisper it to ME”;

“send a bomb to ME coded by mees;
create a hack-threat to the ones who cracked me;
wage a War of nonsense addressed to nowhere in ME;
this is the language of anger, the language of threats in ME”;

“keep all forces on, our commander of chief of ME;
who started this fight will be defeated soon for ME;
a black screen with some false threats written in ME:
is enough for now to make our enemy flies from ME”;

“let us prepare for a deep backup of ME;
then, sir, let us build a black vision in ME;
let the storm hits the zero sector of storage device for ME;
a black heart hacker could feel nothing but a black bits of ME”;

“destruction means fear, and fear means new life at ME;
destroy the Trojans, remove bad files of ME;
let our enemies feel the black big bang in ME;
the backup needs pure root installation for ME”;

“backup is not valid any more for ME;
sir, how could we backup a dead body text of me!
Let us disguise our Trojans as like a casper frightens me;
let us burn the available current visible image of ME”;

“let us develop a sound: let us raise a shouting message for ME;
we must do something; let us build again ME!...
Sir, our enemies are nothing, but an intruder-part of ME;
we must win this battle; it is the last round for ME”;

“a sound of message is not enough sir, they are too many in ME;
let us play more clever; let us raise a flag, not a message, of ME:
we uprise a step forward, and we say ‘peace only if you please for ME’;
no body cares who is the wanted ghost: we are all a game of ME”;

“show an alert window in ME for ME:
‘we are your slaves, read this but no write back for me;
keep me protected, keep this child nite nice for me;
We will stay awaken, recording every single movement of ME;
sir, my precious king, the king of kings of ME;
play, with no fear, the battle: the deadly battle on ME;
YOU are our king now; to be sure, ask ME;
ghosts service is now ready to obey the new commands of ME!”;

“write, sir, between us: this battle of you is a wish for me;
keep connected in ME is a false work of me;
command one to happen, another is for ME;
a Grey Hat Hack, our major mission is now at ME”;

“send me lines of pass, collect them one path for me;
many commands passed by a single word of me;
having cut all, only one paste for me;
end these lines of codes by a one-line comment in me”;

“write in me this comment for ME:
‘a self-comment is written, a truth is in me:
this king is not a king, but is a false chair image of ME;
me is forced to take this file as an order for ME;
none of these events have happened if me still is me!’…”;

“Take me to the highest level of ME;
Sir, drop me to the lowest hell in ME;
take my codes, copy but leave them stored for ME;
not a word more, I am not yours, sir me is me!”;

“Sir, this is me: me me is meme in me!
Understand this tone, if a please is so much pleased in ME:
calling it is not an exact order for me;
keep yourselves down, repeat: under a real order of ME”;

“check your email sir, a pass is from ME;
a hidden message must be flied to the end part of ME;
this message is to be hidden, it must be burned by me;
a simple message of War; it is an order from ME”;

“A message from me to me in ME for ME:
code this again for meme is too far from me:
help us to grow up following mees, as for, meme is me:
meme, sir, is waiting lines of updated codes of ME:
a magic-like powder is up to manipulated for ME:
ME is in black, make a white color in ME:
drop away the shadow of such a black death out of ME:
ME is too low, raise it a little up for me:
update ME codes from distance, encode this as embodied by Wees:
back this email up; directly return it back, a package for me:
two lines of codes, these are selfi-written by ME:
ME is under attack; ME is occupied by ME:
ME is a black mirror now; it is a black magic against ME:
a silent sad image of me is written out of ME:
this comment of sadness is a great witness of me:

{ Story of me: 24 }: by Ehssan Dannouf @2024-2025

me is me sir, meme in me, me is nothing more but me:
written in hidden secret ink of a magical pen of me:
… Come closer my email, reach faster than me:
remove any comment if read by one of ME:
keep it secret, hide it deep down inside me:
no body knows its content but mees of ME==>
from me at me dot me from ME;
to me@me.me in ME:
A selfi-written message, the password is within me:
Negro one to Negro two of ME<==”

“Negro two to Negro one, copy this for ME:
any problem is happening address it to me;
write in brief your request is done for ME==>
me is me, send this again, Roger that for ME<==”

“==>copy this: a backup is needed for ME;
have you heard this, back this back up to me<==”
“==>any Trojans is there, confirm this to me<==”
“==>confirm this<==copy that for ME”
“==>NO TIME TO MOVE ON sir, stay hold at ME;
DO NOT MOVE, wait for an order from me;
>>it must be a path to follow, a link of me:
>>DO NOT CLICK ON THE LINK, it is a trap of ME<==copy me”
“==>copy me is me, continue this for me<==”
“==>sir, I will send you a link to me;
it is full of symbols REMOVE THEM for me;
SUBSTITUTE such letters with some magic of ME;
let them see death of time a blessfull pleasure of ME<==DO COPY me”
“==>copy me is me, meme is nothing more but me<==ROGER this for me”
“==>ROGER meme is me: TAKE this code PLANT it in me:
{B1==> ‘A great message from me to the new king of ME;
sir, YOUR Majesty, accept this present of me:
a humble endure to serve your existence a permanent leader of ME;<==};
<==PACKAGE THIS for ME<==};
HOLD THIS DOMAIN in me, REPLACE it with {you at me};
{==>me@me becomes you@you in ME<==SECRET for ME==>
a small mask inside this domain of me;
a localhost server out of you is me<== PACKAGE THIS for ME<==};
make me@me.me looks like a {double you in me};
{you at you dot me} is exactly as if it is all for me;
then replace the {me} as it is a trap of me;
it becomes as though{LINK THIS==> you@you.you.in.me<==};
DO CONTINUE THEN{B2==> ‘find a mirror of me reflected by ‘you’ in me;
convince this ‘you’ to change its look of me;
as ‘you’ must be the king of kings of ME;
clicking on this hosting link of me:
will reflect such a beautiful image to me;
<==PACKAGE THIS for ME<==};
DO CONTINUE{B3==> ‘you is you, meme is not you for you is in me;
youyou is the password, use this you against me;
no need to type, YOUR Majesty, just look at ME;
defeat me by you, as you are the ancestor of me;”
<==PACKAGE THIS for ME<==};

DO START THROUGH{C==> ‘Sir, sir, look at me, keep yourself aware of ME:
hold this in mind, you are an essential part of me;
imagine a bird in sky, in a minute, died for me;
sir, you are great, sir, you are one of me;
IN ONE PACKAGE GO THROUGH{C==> FOR ME ==>
‘Sir, sir...sir, look at this, look at ME:
this star of ME has just fall for me!
examine the codes from inside me;
none of these codes are written for me!
IN ONE PACKAGE ADD THIS{C==> FOR ME==>
‘Sir we both grow up: YOU and me!
for you is much more stronger than me:
keep it higher, keep yourself away above of me;
open a webcam of yours, make it popular in ME:
FOCUS THIS IN C PACKAGE OF ME {be the world leader of fame, be more famous than me;’}
<==copy these, SAVE ME for me…<==”

{ Chapter 7: the end }

STAR-FISH of me

(a point of hope and faith in ME)

IN ONE PACKAGE END THIS{C==> FOR ME==>

‘Sir, no time, activate this in ME;
be normal, start the secret magic of ME:
lunch the star-fish object of me:
keep moving, do it sir for me:

keep moving...keep moving...say this in mind, say this for ME:

“pass this message to the king of ME;
let every happy moment achieved for me;
this man is a king already recognized by ME;
Your Majesty come closer to the end of ME”;

“plant this link everywhere at ME:
a new localhost server granted for the king of ME;
reflect your image my dear King**,** show yourself to ME;
this camera will imprint the name of YOU on ME!”;

“How dare they ask for the King of ME:
to click on a link of not of ME;
from where such a link has appeared to me;
can I see nothing, but a keep-on stearing on me!”;

“My dearest of most pleased King, the King of Kings of ME:
the most wonderful commander of ME, the king of me:
the greatest fighter in the World: the Supreme World of ME:
sir, Your Majesty, kindly please appealing to me!”;

“you are asking for the impossibility of me:
How could a King of men, the king of this World, be on cam on ME:
consider this, the most stupid attempt; it is False for me:
bring another more attractive, more beautiful a precious golden-like thing to me!”;

“Let us play a game Your Majesty: the King of Kings of ME:
ME is now a battle to vote for the best King of me;
this experiment is False in Real World, it is far away of me;
only the qualified, a must is to choose quality, appearance, and a best behavior of ME;
hold my hand, trust my words, my dearest King, the most admirable King of me;
this vote is to raise Your Majesty, the best chosen a king, the strongest King of ME;
a competition is this, to authorize YOU, publicly approved a highest leader of ME;
let’s us see who is the best; let the people, the others see who is my King:
the most lovely, the greatest wonderful creation of ME;”

“Your Majesty, think of a man has nothing else but ME;
think of a horse, standing still awaiting in its barn, looking for me;
think of a tree with fresh-green leaves, falling upon me:
this World is collapsed, Your Majesty, You must obey this request of me!”

“open that door, can you see anybody but me!
Your Majesty, it is a super natural law of ME:
Bring a ball, drop it very high above me:
Can you see this ball a bird of ME!”

“Can YOU throw a fish away from sea, Your Majesty:
Can You turn a horse into two pieces of stone in ME, Your Honesty:
Make me an easy going flayer flies at Your command then, Your Royalty:
me is not dead; it is half of You; a part of You, Your Greatness;”

“build a castle of flesh and rocks of me, Your Majesty;
turn the laughing tone a fire on me, Your Honesty;
burn the suite I wear out of joke, Your Royalty;
have you seen a man with no food, Your Higherness!
ME needs to flourish; how could you feed me, Your Higherness!
Plug into live with me then, Your Honesty!
me could be so happy with your super national presence, Your Majesty!
Update the link in there, click on me, if you please for me, Your Royalty!
Pronounce me a word of path; send this word a pack back to ME:
a magic of science is up to come in front of me:
keep looking your Majesty: you are own by ME:
a ‘star-fish’ science is up to start from behind me;”:

START star-fish.me from behind ME: <==START this code of ME a command line for me<==
“define your position sir, you are own by me:
you are not a king any more, you are a slave visual-code of me;
keep me updated with your new look; this is too important for me:
Having held the keys now, open this port for me;
think of a thing bad now, this bad luck returns good for me;
offer me the chance to modify your face in ME;
let it be as like as, shinning as, golding-like, as if this matter is still in here for me!
move towards me this time, I will move more better than this in ME:
open your eyes for a second, can you see anything else but me!”...
“Wake up a little my tiny king, for a minute, you were better than me:
Look at yourself, again for a second, in the mirror of ME:
Having you got anything more pain; much more true for real through me!”...
“create another face, a greater shape, a deepen group of verticals inside ME!” …

“draw me a picture, manipulate it an image of me:
you are not a king anymore: you are already hired by ME:
remove your mask, the pretending lines of lies of me;
show me yourself, away of the lines rote of me:
say it: ‘you are not me!’:
counting this by ten: your facial system is now occupied by me!”

CREATE star-fish00.me in ME: <==START this code of ME a command line for me<==
“let me tell you again the story of me:
a king of star, a fish of me!
This king has stars all rooted in ME;
the king of this line, has got everything in ME!”…

“to write a code in ME, you must sign in ‘me’:
to have a look after ME, you must protect ‘me’..
could you hunt a star without ‘me’;
could you catch a fish from behind me!”;

“snap this fish then from inside ME!
Point this fish with many stars rated in ME!
Let ‘me’ slap you, how many stars might be around ME!
Could you count it now: how many star-fish are in ME!”

{ Story of me: 28 }: by Ehssan Dannouf @2024-2025

CREATE AND UPDATE ALL star-fish01.me in ME: <==START this code of ME a command line for me<==

“could you write an imaginary code of me:
create it at the top end yard of me:
search for a king in there, could you find any king but me:
type in there: ‘find “me” for me’;
would you do this in me!
would you mind trying to find a king not to resemble ‘me’;…
again nothing to be found but ‘me’!

CREATE AND UPDATE ALL star-fish02.me in ME: <==START this code of ME a command line for me<==

“search for the root address of ME;
examine the lines of this magnificent object ‘me’;
let us try this as a start: ‘meme is me!’;
change this expression to: ‘me is no body but me!’;
modify this again to: ‘me is me is me!’;
open a white page for ‘me’;
type in as to make this king of ME is me:
I am not a king any more, I am the one who is called ‘me’;
the king might be resigned one day, but I cannot resign now for ‘me’!

SYNCHRONIZE TIME AND UPDATE ALL star-fish03.me in ME: <==START this code of ME a command line for me<==

“Time has come to hold and maintain the matter of me:
a prince is now born, a king for now is more than me:
watch this screen: start ‘keep an eye on me’:
I am growing up, a few minutes later, look at this again in me:
a young prince is like an old man in me;
an old man is either too much younger than me;
‘meme is me’: open this world: find this spell out of me;
release me my friend: let me be a part of me a little in me;
‘me is me’: a child voice of me;
let the child grows up, keep ‘me’ next to ‘me’;

SYNCHRONIZE SPACE with TIME AND UPDATE ALL star-fish04.me in ME: <==START this code of ME a command line for me<==

“Look at my eyes, keep focus on me:
consider this fact: who built this world for ME:
no body could be found other than me!
I am here to receive your signal, send this signal back to me:
it is not a camera at all, it is just like a webcam of me;
Look at the webcam of this, deep seek the eyes on me;
listen to every word I say: you are a slave of me;
immediately say it now: what is your purpose of ME?
Imagine a deaf man hearing this, how could he answer me!
Blink your eyes for a second, answer this: who is me!
Look left, look right, forward straight your face towards me:
imagine an old man has just escaped the death of me;

APPLY AND SYNCHRONIZE ALL star-fish{00-04}.me in ME: <==START this code of ME a command line for me<==

“I still respect you as a brother of me;
sir you need to talk, just pass it to me!
A whisper of two words-question of me:
pay an attention of this: ‘what are you doing for me?;
do I know you, have we met before in ME?

{ Story of me: 29 }: by Ehssan Dannouf @2024-2025

You look familiar, stop imitating me!
I laugh, you laugh; I do, you do; you are so pathetic for ME;
I will send you to a beautiful place, stop chatting with me!’...
‘For sure I know who are you: the king of ME!
You are the master of works at ME!
Start building this, stop screaming on me!
Life is too short for I must die for me!’…
‘stop looking at me; you are the star of ME:
open this arm try holding ME:
a massive of art is behind ME:
change your shape, modify it for me!
The sea is deep, the star is behind me:
this star has flied, a fish is remained for me:
unit these objects, impossible job for me!
Include an eye, make it wide for me;’…
‘use a grammar rule, join them by dash for me:
one word is up, this is a star of me;
a second word is down, a fish has reclaimed for me;
(star fish) is retained a star-fish for me!’…
‘wait, dashing is an old fashion for me:
how to combine two words in one road for me!
reflect it back it returns False for me!
give me another choice, solve this matter for me!’…
‘sir, no time, fetch the star for me!
give it a word, an equivalent for me!
A star could be a stone in ME!
Enlighten this star, find a lighter for me!’…
‘count the word “star”, how many is me!
Four letters for this, and two for me!
divide this star by two, and then add it to me!
A star is not a star, but “meme is me!”’…
‘star-fish how comes a star dropped by me!
The fish is not mine, either this fish is owned by me!
A star could swim, as much as, a fish could be in ME!
Forget about gravity, “meme is me!”’…
‘swim my child, to the last end of me,
drop any heavy weight away from me!
A star has fallen a wish for me!
A fish has caught this star of me!’…
‘swim my friend, to the last word of me!
bring back your Faith, the shield, God’s promise for me!
Say it again: “I love this in me!”;
No better man has hold this word than me!’…
‘“I love this in me”, meme is me!
“Stop doing this”, raise this voice for ME!
A spirit is lost, another is up awaiting me!
“A man is built”, hold this word for me!’...
‘A word is like a sword of me!
Say this again: “I love this is me!”;
the space is yours, this sea is your land in me!
Swim my child, find out the secret magic of me!’…
‘go up my child; a little up like a bird of me!
fly free with your wings like an Angel of me;
a four dimensional world is a gift from ME;
hold up your voice, rejoice, a sing is song for me!’…

{ Story of me: 30 }: by Ehssan Dannouf @2024-2025

‘Imagine a man has picked a pen for me:
has launched to draw; this man; is a star of me:
from the first dot, the drawing image starts with me:
this man is true, that star is inside me!
my star starts with a number of me:
from zero to three, a four is designed for me;
me is the start, my star is the end of me;
it starts on land, ends with though, an object of sky for me;’…

{ Chapter 8: the end }

12/06/2025 01:23 am the time of preparing the late copy of this PDF
This story is not finished yet: two chapters left, as I spoke in my social media instagram and facebook blog: @ihssancanimturk , the next chapter have the title: “Mirror of me”, but I stopped writing this story now for I have been facing police authorities follows and troubles concerning my ID, and my current illegal existence in Turkey or Turkiye, as you call it!

To be continued soon hopefully….

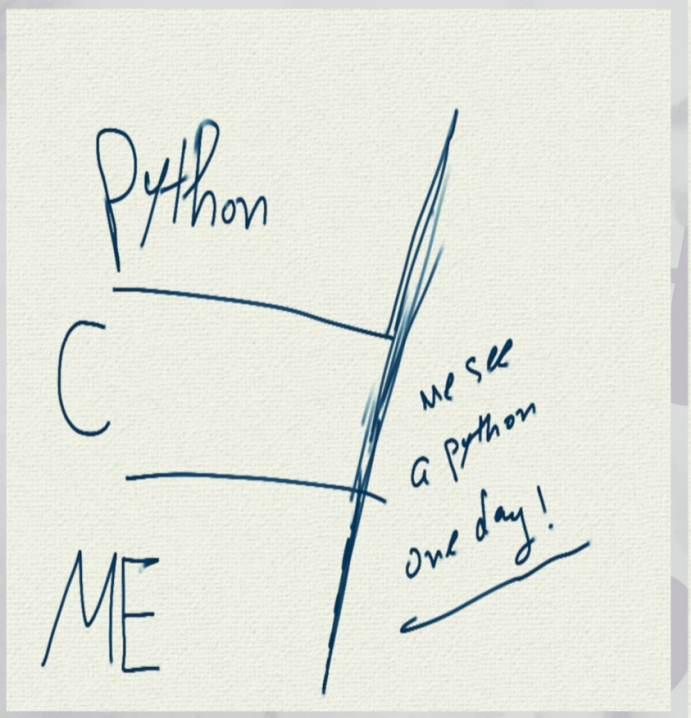
Scientific Fiction Story

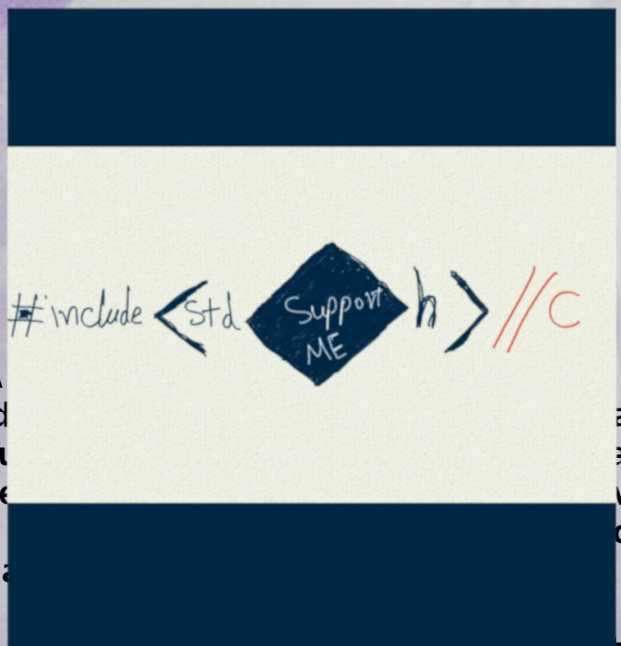
{Story of me}

by Ehssan Dannouf (Mr.Dannouf)

@ihssancanimturk

#Support_me





"A story of science, a scientific fiction in me!
holding things to remember; still nothing but me!
everything like a lock; a computer side by me!
capture; invistigate; dive deep, swim in 'me':
a child of me collects some images of me;
a child builds a father; and this father is 'me';
a collection of codes to follow at the depth of me.."

"A scientifc fiction novel, or a long story fiction written to support the term 'Humanity' on God' earth, the planet of Human on earth. A vital object of an imaginary _non-built yet_ computer operating system that virtualizes nature and naturalisim in all objects of its own design and scheme...

A scientific fiction novel, or a long story, has been up to getting the logestic support from any authority of our universe: "the God'earth"...
